

Part A: State of the Environment over time

Water consumption from Council assets per resident (KL)

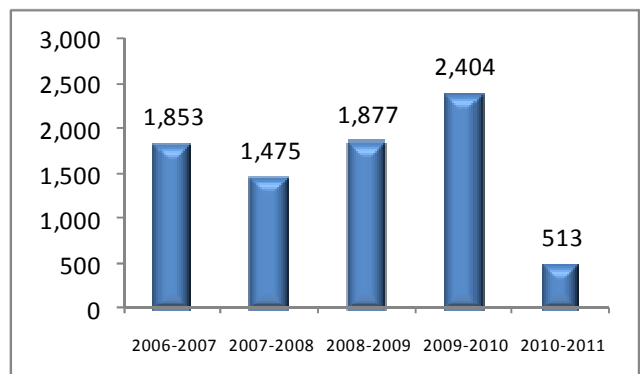

Part B: Council response

Storage capacity of rainwater tanks installed on Council Leisure Centres (litres)

Water use offset by irrigation of recycled effluent on sports fields and parks (megalitres)

Part C: Performance Summary (from primary indicator)

Trend over time

Improvement—Ongoing decrease in consumption per resident

Performance against target

(5% improvement from previous year)

Performance against other local government areas

6% better than national average

Part D: Comments

Council adopted an Organisational Energy and Water Management Policy in October 2007 to guide Council's efforts in the efficient and effective use of its energy and water resources. Council has initially focussed on reporting the corporate water use and now has to co ordinate the implementation of this policy to improve the corporate performance.
